

# Company Overview

*"PDS Is a key asset that we rely on everyday for our continued computer network stability." - Country Club of Detroit*

*"I consider the business relationship we have with PDS being one of the best we have developed." - Daniel L Johnson. IT Administrator. State Wire and Terminal, Inc.*

*"PDS is a key competitive advantage." - Robert J. Klapish Jr. VP, General Manager. Ideal Setech*

*"PDS has a great relationship with OHCC. They are friendly, customer-oriented and provide great technical support." - Oakland Hills Country Club*

## **"To Save Our Clients Time and Money by Allowing for Maximum Productivity".**

That has been Preferred Data System's Mission Statement since our incorporation in 1999. PDS can assume full responsibility for your entire network including servers, firewalls, workstations and other critical components. This allows you to focus on what you do best, running your business. Strategic planning is the key for any successful business and that goes for your IT infrastructure as well.

**Designed properly,** a comprehensive plan will accommodate for strategic growth and allow your company to maintain its competitive edge. PDS' experience in the small to mid-size marketplace allow us to help you design and implement an IT strategy that fits your current and future needs. If you prefer a time and materials based solution, we can provide that as well. PDS will work with you to design the perfect IT strategy for your business.

**Choosing the right IT provider** can make the difference between the success and failure of your company. Choosing one with too little knowledge and foresight leads to extended downtime and lost productivity. Too small and it has a similar impact as response time to your problems can be slow. PDS has thrived in the SMB market by providing outstanding service at a reasonable price. The success of our company is directly related to the success of yours!

**P. Kelly Comeaux** *President*

Kelly Comeaux has over 25 years of computer technology experience. He is certified in dozens of technologies with expertise in Cisco and Microsoft platforms. His success is based on his ability to convey complex 'tech-talk' in plain English. He believes in customer satisfaction above all else by providing quality service to every client.
